

APICS Execution & Control of Operations (ECO) 40 Hrs

This course is one of five modules in the APICS CPIM certification series. It is intended for Operations and Supply Chain professionals who want to improve their knowledge and skills in operations and Supply Chain Management and master the APICS Body of Knowledge terminology and concepts.

Learn to translate plans into operational activities and define and apply techniques in the operations field. Topics include:

- Comparing actual output to plans and taking appropriate corrective actions
- Communicating ideas in a group setting and instructing others in tasks
- Creating operational solutions in the face of competing resources
- Explaining the release of work and reporting performance through data collection
- Understanding the execution of quality initiatives and continuous improvement plans
- Evaluating trade-offs and participating in design decisions

Who should attend: Planners, buyers, master scheduler, demand planners, inventory management, supply chain management, production control management, operations management, cost accounting, quality management, and others who want to expand their knowledge and ability in the planning of resource allocation.
