

APICS Principles of Procurement

40 Hrs

This program provides the concrete, practical information you need to thrive in today's procurement work environment. You will learn about the fundamentals of procurement, sourcing strategies and supply chain performance measurements. Course materials emphasize essential vocabulary, application of principles and concepts, strategic and tactical methods of implementation, and understanding the roles of interdepartmental relationships.

The course offers an exciting classroom-based, instructor-led educational opportunity for people new to supply chain or for those with experience who want to gain additional insight and expand their skills. Participants gain practical, essential skills that help them become more effective and productive in their jobs.

Topics include:

- Fundamentals of Purchasing
- Sourcing Strategies
- PO Management & Performance Measurement

Who should attend: Buyers, procurement agents, planners, supply chain management, production control management, operations management, and others who want to expand their knowledge and ability in the field of procurement.
