

Scrum 101: Intro to Scrum Project Management 12 hours

Scrum is a structured and disciplined team-based approach to product development and project management. It is a process which involves converting customer requirements into usable product quickly, then re-evaluating those requirements and working the cycle again. Scrum 101 is an introductory course focusing on the 3 Roles, 3 Artifacts and 5 Activities of Scrum Project Management. You will learn the standardized structure of Scrum, starting with foundational knowledge and then application.

Who Should Attend: This course is intended for the unexposed, as well as practitioners of Scrum. Project Managers, Sales, Engineering, Developers, Assemblers, Managers and Supervisors will all benefit from this style and the tools and techniques covered. If you have suppliers using Scrum, this course will also help you work symbiotically with them.

ETI Instructor Mike Letson is a certified Six Sigma Black Belt specializing in transactional analysis for organizations ranging from city governments to manufacturing. He is known for his high energy and results driven instructional techniques. He brings a wide range of experience from military, corporate, and entrepreneurship, allowing him to relate topics directly to each participant. Mike successfully finds new ways to combine having fun while learning.
